+91 9886681408 yashashwinimv0@gmail.com [yashashwiniMV-LinkedIn](#) [YashashwiniMV-Github](#)

Innovative Computer Science Engineering student with strong foundations in programming, data analysis, and AI/ML. Experienced in building real-world projects using Python, SQL, NLP, and computer vision. Seeking an entry-level role to apply analytical thinking and problem-solving skills in data-driven decision making.

EDUCATION

Cambridge Institute of Technology-VTU 2022-2026
B.E in Computer Science and Engineering Current GPA:8.0

COURSEWORK

Courses: Python for data science, Data Structures & Algorithms, Object-Oriented Programming.

SKILLS

Technical Skills: Python, Java, SQL, HTML/CSS | TensorFlow, OpenCV, Flask, React
Tools & Domains: GitHub, VS Code, MySQL, Azure | NLP, Computer Vision

PROJECTS

Mental Health Companion | Python, NLP, JavaScript, HTML/CSS Jul.2024–Aug.2024

- Built a wellness app with an NLP chatbot, 3 stress-relief games, and a journaling system, engaging 50+ users.
- Processed 1000+ queries with 85%+ accuracy, boosting user engagement by 40%.
- Implemented sentiment analysis for personalized responses, improving support efficiency by 30%.
- Designed a journaling dashboard that logged 200+ entries, helping users track mood and progress.
- Optimized backend queries, reducing response time by 25%.

AI-Powered Smart Mirror | Python, OpenCV, React, Raspberry Pi Jun.2024–Ongoing

- Developed a smart mirror with skin analysis, hair try-on, and burnt-patch detection, tested on 100+ users.
- Integrated gesture-controlled AR overlays, achieving 90%+ overlay accuracy with <2s response time.
- Embedded system on Raspberry Pi, reducing processing latency by 35%.
- Conducted usability tests with 30+ participants, increasing feature adoption by 50%.
- Analyzed modular architecture, making the system scalable to 5+ new AR features.

Makeup Try-On Web App | Python, OpenCV, MediaPipe, React Mar.2024

- Created an AR web app for lipstick & blush try-on, tested with 75+ users.
- Delivered real-time overlays with 90%+ accuracy and improved rendering speed by 25%.
- Enhanced UX with precise MediaPipe landmark detection, cutting overlay errors by 20%.
- Implemented gesture-based controls using MediaPipe Hands, enabling users to switch shades seamlessly without UI interaction.

Achievements

Hackathon Finalist | Technosav 2025 Apr 2025

- Improved and built an AI-powered Beauty Smart Mirror with gesture controls and real-time try-on features.
- Selected as a finalist among 50+ teams, showcasing innovation and applied AI/ML skills.

Startup Accelerator Participant | TCS DISQ Bootcamp (Team CHOSS) Feb 2024

- Selected for TCS's competitive accelerator program, mentored by industry experts.
- Contributed to prototype development, pitch decks, and product strategy, strengthening entrepreneurial exposure.

EXTRA-CURRICULAR ACTIVITIES

Cultural Activities – Dance 2018 – Present

- Participated in 5+ inter-college and cultural fest dance events. Contributed to team performances that won recognition at college-level fests.
